

*{**Organization name**}* encourages the professional interpretation and translation of communications for the public and/or intended specifically for the immigrant community. As *{**organization name**}* does not offer professional interpretation services, we redirect requests for interpretation and translation to professional agencies. Our goal is to build best practices within our community for working with people who are not fluent in English. Please refer to the Immigrant Service Providers Network's (ISPN) [recommendations](#) for a list of best practices, as well as for referrals to organizations that offer professional translation and interpretation services.
